

Purrfect Pets

–Learn about and Find your new best friend–

Sketches

Purrfect Pets is an app with information about all types of pets in one convenient location including habitat, typical personality, diet, and how much time you'll have to dedicate to caring for your pet each day. This app also connects you to the websites of your local shelters and pet stores. In addition, I have started conventionalizing an AR aspect that adds interactions with various types of animals in order to help judge what life would be like owning a specific type of pet.
